Wayne – glad you have Steve in the field doing some oversight of the drilling. I'm curious of the total depth of the LSZ borings – according to Table 4-1 of the addendum, LSZ50-INJ was supposed to go to 220 ft. Steve's memo states that NAPL odors/positive dye test goes to 223 ft. Was this borehole continued until they found the bottom of the LNAPL? Also, the May 23 email states that packers were installed in LSZ51. What was the purpose of this? thanks Eva
